

CyberNut VS Infosec

Why do schools districts switch from Infosec to CyberNut?

CyberNut is **the only phishing and cybersecurity training platform** built **exclusively for K-12 schools**—engaging educators, simplifying reporting, and driving real results.

With **gamified micro-trainings, automated simulations, and real-time reporting**, CyberNut helps **schools build a strong cybersecurity culture**—all through an **easy-to-use platform** designed for busy educators and IT teams.

	 	 INFOSEC
	K-12 tailored training content, specifically designed for faculty, staff, and students.	Generic corporate training content, designed for broad industries.
Ease of Use & Campaign Management	<ul style="list-style-type: none"> ✔ Automated phishing simulations and training campaigns—ready to use. ✔ No IT expertise required; simple dashboard for teachers and admins. ✔ Quick 20-minute setup for seamless integration with school systems. 	<p>Built for various industries, resulting in a less tailored setup for schools.</p> <p>Requires manual configurations, which extends deployment times.</p> <p>Lacks K-12-specific design, making it more challenging for school administrators to navigate.</p>
User Engagement & Training Effectiveness	<ul style="list-style-type: none"> ✔ Interactive, short micro-trainings (30 sec each) keep users engaged. ✔ Encourages reporting through gamification—staff feel motivated, not forced. ✔ Positive reinforcement model helps users improve without penalties. 	<p>Relies on long, dull videos, promoting passive learning.</p> <p>Lacks gamification and K-12-specific features, reducing engagement.</p> <p>Focuses on punishment for errors, leading to a negative learning experience.</p>
Compliance & Reporting	<ul style="list-style-type: none"> ✔ Designed for K-12 compliance (DIR-certified, EU GDPR compliant). ✔ Easy reporting tools for cyber insurance and school boards. ✔ Real-time tracking of phishing click rates and user improvements. 	<p>Designed for broad industries, resulting in compliance tools that don't meet K-12 needs.</p> <p>Offers limited reporting, leaving users without clear insights on real threats.</p> <p>Features complex dashboards built for corporate IT, making navigation difficult for school administrators.</p>
